*Versatility, value and European style*

# MARCOPOLO AUDACE

The highly versatile Audace is Volgren's first Marcopolo bus for the Australian market. Its European styling and emphasis on driver and passenger comfort makes it a joy to ride, to drive and to look at.

The streamlined design of the vehicle not only makes it functional, but a visual standout, which has resulted in many vehicle enquiries and sales.

But what about some of the more practical and technical details?

We've developed it as a vehicle ideal for short and medium distance standard school and charter bus operations – and because we can add features (for example, a toilet facility and wheelchair lift) you get the flexibility that comes with a multipurpose vehicle adapted to your requirements.

We've carefully taken into account comfort, ergonomics and safety in the design of the Audace. The windscreen and bonded glass panes extend visibility for the driver and the passengers. LED lights increase energy efficiency and require far less maintenance when compared with alternatives.

In addition to the LED illuminated entrance steps, the bus features a plug door that moves into the vehicle to offer increased security and functionality. The handrails are positioned in accessible positions, and the bus is fitted with a four-camera CCTV security system for increased passenger safety.

## KEY FEATURES

- Advanced driver ergonomics coupled with a new multiplex system and dashboard layout
- Four-camera CCTV system
- RTA 146 door safety feature
- Three full-width luggage bins providing 9 cubic metres of storage capacity
