Welcome to the future!

Meet the new Marcopolo G8, a Premium vehicle that has arrived to transform passenger road transport. Go aboard this new generation and understand why the future arrived here first.

G8 | Taking you to the future.

Excellence for all

We proudly present Generation 8. On the following pages you will learn about the main attributes for passengers, drivers and operators.

With high levels of reliability for Comfort and Safety for the driver and passengers, the new generation delivers Performance and Sustainability for your company and takes the next generations even further.

**Excellence for
the driver**

The most advanced technology has just arrived

01

Ergodesign seat with shell-shaped foam that "hugs" the driver.

02

Panel and internal finishes with the soft touch concept. Injected part, less noise and better finish, provides more thermo-acoustic and visual comfort.

03

Redesigned defroster features 23% higher efficiency, improving driver thermal comfort and reducing windshield defogging time.

04

Space for a storage compartment that can be converted into a 30-liter refrigerator integrated into the dashboard.

Optional Item

05

ERV system with night vision, which replaces rear-view mirrors with cameras, eliminating blind spots.

Optional Item

06

Head Unit with 10" screens provides all control functions at the driver's hands.

07

Translucent area at the bottom of the door that helps to see small obstacles and boarding platforms.

08

The panel, with a reduced height of 70 mm makes it possible to see obstacles from a shorter distance.

09

Rear-view mirrors with new design and enlarged lens width.

10

Exclusive Marcopolo Full LED lights that ensure visibility up to 3.5 times better than those already on the market.

Excellence for passengers

01

Wider luggage rack, with integrated handgrip and new attaching system that prevents noise.

02

System that offers passengers different means of collective or individual entertainment with headphones, integrated USB and high definition digital image.

03

Stairs with indirect lighting system and new angle that offers even more safety while boarding.

04

Handgrip with new handle to make getting up easier.

05

Lighting mode when boarding turns on the reading lights automatically, making it easier to locate the seats. Internal lighting system made up of 100% LED.

06

Exclusive ducts distribute the air more evenly, making it possible for passengers to have individual control.

07

Restroom with larger window and mirrors, in addition to lighter colors that convey a feeling of spaciousness.

Optional Item

Excellence for operators

01

Over seven thousand hours in virtual simulations and ten thousand hours of laboratory tests and track tests, simulating over eleven thousand km of road traveled, to ensure the durability and reliability of this vehicle.

02

Bumper with new design.

03

Easy-to-operate front grill opening system allows greater access to the defroster, enabling agile and ergonomic maintenance.

04

Rear-view mirrors that can be replaced by a single professional with 100% external access to exchange components.

05

Side windows that vibrate less and are easy to maintain, with no lower application of a trim cord.

08

Electrical system can be monitored remotely and modules can be updated remotely through Marcopolo's online service.

06

Lighter rear cover with ample space for maintenance made of a highly resistant material with great deformation capacity.

09

Restroom with a new system that reduces maintenance, supply and cleaning by 50%. Ecoflush system.

07

Service door with direct link mechanism, combined with the double-bulb sealing system and toplock system, provides the set with a smooth and constant movement, ensuring durability and fewer interventions for system maintenance.

10

Modern engineering software and advanced manufacturing processes ensured a lighter vehicle with 11% improvement in the aerodynamic coefficient compared to the previous model with the conventional mirror. Superior aerodynamics and increased operational efficiency.
