

ENVIRONMENTAL POLICY STATEMENT (V004)

The objective of this Policy is to be the leader within our industry on environmental management relating to bus body design, manufacture and service of cleaner and greener buses that not only reduce emissions but also lower noise levels, thus preserving the qualities of sustainability on the environment.

Volgren recognises our legal and moral responsibility to protect our environment through the implementation of an effective environmental management system in meeting the requirements of the ISO 14001.

Volgren will do this by:

- Creating an awareness of our impact on the local and global environment and commit to sustainable practices.
- Complying with the relevant laws, regulations, statutory obligations and relevant codes of practice.
- Effectively utilising our resources and reducing waste in our work practices at all levels through education and training.
- Preventing environmental incidents and pollution through identifying and managing environmental aspects and their impacts.
- Pursuing a program of continuous improvement by reviewing our Environmental Management System and related objectives and targets, policies and practices.
- Fostering a culture of environmental consciousness and action through proactive staff involvement and by communication of our policy and environmental performance to both internal and external interested parties.
- Applying design criteria to eliminate or minimise the effects and risks that may be associated with our operations and services.

Management has the overall responsibility for environmental issues. This includes environmental policy formulation, implementation and review.
